DETAILED ACTION

Drawings

The drawing corrections and the corresponding amendments to the specification filed August 11, 2005 have been approved by the examiner.

Election/Restrictions

Claim 8 recites in the preamble "In a processing vessel wherein" which is a preamble for an apparatus claim. The preamble of claim 8 must be amended to recite the claim as a method claim since the method claim of the originally filed claims was elected in the response filed May 16, 2005. In line 1 of claims 9-11, "means" should be changed to "method" or similar recitation, as appropriate.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 8, line 1, "the process" and "the fluid" lack antecedent basis. In claim 8, line 4, the recitation that the barrier is "constructed in a manner that will permit..." is vague and indefinite.

In claim 8, line 5, the same said barrier" should be recited as "the barrier" or "said barrier." The recitations "of same said barrier" in claims 9 and 11 and "same said barrier" in claim 10 should similarly be amended. In claims 9 and 10, the claims should be dependent on claim 8, not the canceled claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Buchanan (U.S. Patent No. 6,207,032). Applicant has stated in the remarks filed with the amendment of August 11, 2005 that "all of the louvers move in unison" in order to differentiate the reference from applicant's invention. Buchanan, however, teaches that the louvers (20) are operated in pairs such that a first pair of louvers opens in a first direction and the next pair opens in the opposite direction to thereby control the flow of emulsion therethrough, col. 7, lines 40-55. Thus, the permeability of the barrier is adjusted discretely within different areas of the barrier.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
